

## BreastDefend®

Promotes Breast Health\*

*BreastDefend* contains eight carefully chosen and clinically tested natural ingredients that protect and promote breast cellular health, healthy hormonal balance, and healthy immune function.

- Promotes breast health\*
- Supports cellular health\*
- Promotes healthy immune system function\*
- Scientifically researched formula
- Gluten and allergen free; vegetarian friendly

### Extensively Researched Ingredients

Every ingredient in *BreastDefend* is chosen based on the best scientific research on phytonutrients, botanically enhanced medicinal mushrooms, and antioxidants.

### Promotes Cellular Health

*BreastDefend* contains a highly absorbable, patented form of turmeric called BCM-95® that is shown to balance inflammatory signaling and regulate healthy breast cell behavior. Paired with another well-known antioxidant, Quercetin, *BreastDefend* delivers powerful cellular health support. The formula further supports breast cellular health with *Scutellaria barbata* and *Astragalus membranaceus* extracts - both time-tested herbs rich in active compounds such as saponins. Ongoing studies show that saponins and other botanical compounds abundant in these herbal extracts support healthy breast cell behavior and strengthen immunity.

### Provides Critical Hormone Modulation

Studies have demonstrated the protective powers of cruciferous vegetables like broccoli and Brussels' sprouts, especially where breast health is concerned. This unique benefit is attributed to a natural compound called DIM (3,3'-diindolylmethane) known to promote beneficial estrogen metabolism. *BreastDefend* delivers significant amounts of this critical phytonutrient which is essential for the protection of breast cellular health.

### Powerful Organic Immune Support

*BreastDefend* includes three different species of botanically enhanced medicinal mushrooms—*Phellinus linteus*, *Ganoderma lucidum* (Reishi), and *Coriolus versicolor* (Coriolus). These mushrooms are carefully cultivated indoors by USDA Certified Organic growers on a blend of immune supporting herbs and organic brown rice. This beneficial mushroom blend offers superior immune support, with a specific focus on breast cell health.

### Ongoing Scientific Research

Research on *BreastDefend* continues to show its effectiveness in the protection and promotion of breast cellular health.

### Supports Conventional Protocols

*BreastDefend* is safe to use with conventional protocols.

### Enhances Holistic Protocols

*BreastDefend* has been shown to work synergistically with *PectaSol-C MCP* and other cellular health botanicals and nutrients to offer a significant increase in breast cellular health protection and support.

### Manufacturing and Quality Control

This formula is prepared with the highest quality active ingredients under conditions that meet or exceed good manufacturing practices (GMP) as defined by the FDA.
